Career pathways: post-16 qualifications held by employees

Welcome

The longitudinal education outcomes (LEO) study now includes information on the industry sector of employment for Pay As You Earn (PAYE) employees. Using LEO, we can link the industry sector of young employees with the education achievements that helped guide them there.

The data in the career pathways dashboard aims to use this development to:
- Explore how LEO can help us to understand the education pathways of employees in different industry sectors
- Demonstrate how LEO data could be used to develop a careers information tool via an interactive dashboard

This dashboard has been produced to support the aims of the Unit for Future Skills Add link to UFS. The complete underlying data for the dashboard is published alongside the accompanying statistical release https://explore-education-statistics.service.gov.uk/find-statistics/. You can access specific cuts of data by using the 'download' buttons on each page of this dashboard.

Contents

Industry Sector Overview

This tab provides a region-specific overview of employees who work in each industry sector. It includes information on overall levels of education and average earnings, the sub-sectors of work, and subject and qualification choices. It

IDBR and SIC background

IDBR (Inter-Departmental Business Register)

IDBR data is a comprehensive list of UK businesses used by government for statistical purposes.
